Kit includes the outside keyed lock assembly, inside lock and associated nuts, bolts and shims required for installation. Lock Plate Dimension: 5"(H) x 2"(W) Part number: 405761.0005, 410110.0001, 410110.0002 Product Videos Write a Review 5 Posted by Carmen Saltarelli on 12th Apr 2021 High quality, easy to install and matches original equipment. Heavy duty key is a bonus as many aftermarket kits use a cheap brass key that is too weak to actuate the lock. I recommend this item. 4 Posted by Robert Hinds on 25th Mar 2021 Lock set has been installed and works as it should. My only gripe is that it lacks instructions. I was able to figure it out but some instructions and a inventory of parts would have been helpful. 4 Posted by Robert Engle on 20th Dec 2020 There were no installation instructions with the kit. The lock cylinder will not turn with key. Are there installation instructions available to see if I missed something? Old one I had on garage the lock cylinder would turn and would leave door unlocked if desired. 4 Posted by Dennis Nimrichter on 28th Aug 2020 This kit was not an exact replacement for the original lock set. The picture is of the original set. The screw holes did not match either. All that said, I was able to make it work, and work it does. 5 Posted by Tom Wenzel on 10th Aug 2020 Good Day, I found the product to be exactly as advertised - a keyed overhead door lock assembly. Installation is fairly easy requiring basic tools. Identify your door reinforcement points, set your mechanical lock position, mark your holes, and get ready to drill through your door. . 5 Posted by Charles Tovey on 26th Jul 2020 Worked great, assembly instructions drawing would be helpful 5 Posted by Unknown on 24th Jul 2020 Arrived in perfect condition, separated easily, installed within 10 minutes. 5 Posted by Kerwin Wilkins on 11th Jun 2020 Very good quality replacement product 4 Posted by John Bryenton on 4th Oct 2019 Perfect fit for the garage door I purchased it for. Took 30 minutes to install with no issues. 4 Posted by christopher leppert on 17th May 2019 It's great that you sell this product, but: OHD co. installed this garage door not too many years ago and the lock is on the right side of the garage door when facing into the garage. The 'handing' of the old style box (on the inside) used to be reversible. The one you sent me is not. Can't I get an old style box? The outside handle and key cylinder is upside down. The box you sent me is sturdier but does not have the OHD logo on it. 5 Posted by Michael J on 20th Jul 2017 Thank you,very happy with everything, post women delivered all parts to me today In Ireland. I can now refurbish my old door with new parts. Good job 5 Posted by rick on 9th Jun 2017 Replaced old sets from original build in 1995. Installation took less than 30 minutes. A properly installed and maintained garage door can provide security and peace of mind for your vehicle (if you use your garage that way) or general storage (if you don't) for years. Garage doors are firm and well built and there should be no need to replace them if they are looked after. Garage Door Spares, or GDS to our friends, are keen to make sure you find can get the job done as simply as possible - we offer advice on tools, a garage door identification service and the understanding of all garage door problems that can only come from years of experience. Take a look around our site - you are bound to find the right replacement part or tool for your need. We stock for all the brands - whether major or more specialist: Garador, Birtley and Gilderol all share space in our stockroom. The Widest Range of Garage Door Spares and Tools At Garage Door Spares, we have done our research and hard work to provide a one-stop location for all your spares needs. We stock a massive range of parts from every major garage door vendor to make sure that we have the exact right replacement item for you to make your repair. From Henderson or Hormann, or Cardale to Compton, we have the cables, door handles and seals to fit every garage door manufacturer - and we stock a lot more than just your basic kit. With a dedication to garage door spares, we focus on the precise part to replace any damaged piece. Look for a seal specific to Westland, or cable to fit a King-made door? We have the exact item. Not only that - but we always have the right tool for the job. There's no point in getting a precision-made replacement part only to try to jimmy it into place with whatever you have lying around. Investing in the proper implement to perform your repair may cost a few extra pounds, but it'll save hours of frustration on the day! Fast, Friendly Communication to Help You with Your Repair For us, being a reliable, friendly company is important. We are here for you to help you select the right part and tool, and to help you understand the process of the repair. Most garage door repairs are simple, but what may be easy for us after years in the industry can seem daunting for a first-time repairer. Our advice is clear and easy to follow. We don't try to confuse with technical terms - it's important to us that you can get the job done and have your garage back to its full secure state. And, if you ever need that extra bit of help, we're available to answer your questions and will do our best to get back to you in a timely fashion. Whatever damage has been done to your garage door, we're here to help you get it back on its hinges - if you need any help, just give us a call, leave a voicemail or write a quick email.
